

UI

Variant
Data

```
graph TD; UI[UI] --- VD[(Variant Data)];
```

The diagram illustrates a system architecture with two main components. At the top is a rectangular box labeled 'UI'. A vertical line connects the bottom center of this box to the top center of a cylindrical database icon below it. The cylinder is labeled 'Variant Data' in two lines. Both components have a light gray fill and a dark gray border. The cylinder also features a 3D effect with a darker gray base and a lighter gray top surface.
